Objective

Software Developer (B.Tech, AI & ML) with experience building scalable APIs and real-time systems supporting 20,000+ concurrent users.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, Java
- **Frontend:** React.js, React Native, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, Spring Boot (basic)
- **Databases:** MongoDB, Redis, PostgreSQL (basic)
- **Tools & Platforms:** Git, GitHub, Docker, Linux, Postman, Selenium, BeautifulSoup
- **AI:** LLM Applications, RAG, Prompt Engineering, LangChain

Experience

Software Engineer Intern – Ridemap (ridemap.in) *2024 – Present*

- Built a real-time GeoFence notification system supporting 20,000+ daily active users.
- Migrated backend infrastructure from Firebase to Appwrite, improving scalability and reducing operational overhead.
- Developed Node.js, Appwrite and WebSocket services supporting 20,000+ concurrent connections.
- Identified and fixed API and authentication vulnerabilities, strengthening system security.

Projects

PrintA4 (printa4.in)

- Built the complete backend for a print management platform handling print orders, Razorpay payments, and automated print workflows.
- Implemented API authentication and security controls for reliable print operations.
- *Tech Stack: JavaScript, Appwrite, Razorpay, React.js*

JSIP – Patent Management Portal

- Developed a cross-platform patent management system using a Tauri desktop application and companion web portal.
- Built an offline-first architecture with SQLite and automatic synchronization using Appwrite.
- *Tech Stack: Rust, SQLite, Appwrite, React.js*

Education

Manakula Vinayagar Institute of Technology, Puducherry *B.Tech, AI & ML – 2026*

Government Higher Secondary School, Thirunallar *HSC – 2022*

Cauvery Public School, Neravy *SSLC – 2020*

Certifications

- Application Development Using Node.js – Udemy
- AI Fluency: Framework & Foundations – Anthropic
